

The WaterHotel

The **Dämman** LightHouse Newsletter Issue # 1 2008

Dear **Dämman** Friend and Supporter;

As we enter 2008, **The Dämman LightHouse – “The Queen of the Baltic”** - and **The WaterHotel at Dämman LightHouse** enter their sixth phase of their history, the first being the original construction, the second, the life as an active LightHouse for almost 100 years (from 1874 to 1969), the third, left abandoned, slowly disintegrating and withering away (1969-1995), the fourth of reconstruction/getting Her life back again (starting in 1995 and still ongoing), the fifth as an exotic and upscale hotel, restaurant and conference & recreation center (as of April 26, 1999) and, now, the sixth as a totally independent sanctuary and to a certain extent a ”mirage”.

During 2008 - and possibly also part of 2009 - we plan to complete all constructions which include a **wind power plant** as the main source of energy, complementing the existing diesel generators (Dämman already makes its own water from the breached Baltic Sea water) as well as the since long

planned and ”half ready” construction, affectionately dubbed **”Atlantis”**, adding 6 double rooms, a two room suite/”apartment”, showers, a sauna and a **spectacular wine cellar** – on top of it a 250 sq meter **”Heliport”** - and outside, towards the Lagoon, **The WaterBar** and a **swimming pool**, with heated sea water, as well as finalizing the construction on all the piers, at this stage mostly surface work and no under-water work.

As a result there will only be limited possibilities to receive guests, for above all safety reasons, but also for practical construction reasons (barges, compressors and other heavy construction machinery will have to be moved) during this construction period.

There will, however, be certain opportunities to receive guests, as long as the time suits our then current construction plans (which surely will vary and change as we go along depending on the weather and other reasons).

We therefore ask you to contact us as soon as you can, should you wish to visit ***The WaterHotel at Dämman LightHouse***. We do have certain flexibility in the construction work and the sooner we know the better we can plan the periods when we can receive our guests. For the Winter season November – March, we of course as always have to make reservations for the weather conditions – by definition we never close, but may at time have to be closed!

We thank you for showing interest in visiting ***The Dämman LightHouse*** and ***The WaterHotel at Dämman LightHouse***, we are honored.

For your information ***Dämman*** has been presented in hundreds of feature articles all over the world since 1995 and in many television (traveling) programs, also all over the world. Today most of her visitors are from abroad, while also several Swedish, local, regional and national (as well as international, of course!) companies have become regular guest, frequently returning with their employees and/or customers/suppliers from all over the World – again we are very honored.

We hope that we can accommodate your wishes, even if it is with certain compromises time wise.

With the very best ***LightHouse*** greetings,

Hokan & Lena Cederberg
